AcPC4610CC
CompactPCI
Non-intelligent
PMC Carrier Card
(conduction-cooled)

Description
This board provides an easy and low cost solution that enables use of a PMC mezzanine I/O module in a standard 3U CompactPCI computer system. The carrier card acts simply as an adapter to route PCI bus signals to and from the PMC module through the CompactPCI card slot edge connector. All Acromag PMC modules and those from other vendors are supported.

This board uses a PLX Technology PCI6540 transparent PCI/PCI bridge for data transactions from the PCI bus (system host) to the PMC site. The bridge device provides a 32-bit 33/66 MHz PCI interface.

A heat frame enables conduction cooling in applications where ambient or forced air can't provide adequate cooling. This unit is ideal for airborne systems, deployment in battleground equipment, and other situations with advanced thermal management requirements.

Field I/O signals are routed through the carrier card's rear J2 connector.

An air-cooled rear transition board, Acromag Model TRANS-C4610, is available to map the field I/O on the PMC module to the rear of the CompactPCI system.

Features

- 3U CompactPCI card
- Holds one PMC card
- 32-bit 33/66 MHz PCI Interface
- Transparent PCI/PCI bridge for data transactions from the PCI bus to PMC module
- Rear connection I/O access
- Supports both 5V and 3.3V signaling
- Conduction-cooled -40 to 85°C

Specifications

Environmental
Operating temperature: -40 to 85°C or conduction-cooled.
Storage temperature: -55 to 100°C.
Relative humidity: 5-95% non-condensing

American National Standard for 2mm Connector Equipment Practice on Conduction Cooled Euroboards:
American National Standard for Conduction Cooled PMC:

Power (received from the CompactPCI 3U Back Plane):
3.3V DC (±5%): 135mA typical, 150mA max.
5.0V DC (±5%): 50mA typical, 70mA max.
±12V DC (±5%)**: Per PMC module.
* With no PMC module installed, ±12V DC not used.
** Max power 7.5W (total all supplies) per PMC standard.

MTBF: Call factory

Physical: CompactPCI Carrier Card
Physical configuration: 3U CompactPCI Card 100 x 160mm.
Rear CompactPCI connectors: 2mm J1 & J2 connectors.
PMC connectors: Three 1mm connectors.
The conduction-cooled model (AcPC4610CC) uses a conduction-cooled frame with wedge-locks and thermo bars.

Physical: Transition Module
Physical configuration: Half-length 3U CompactPCI Card 100 x 80mm.
Connectors: 2mm RJ2 connector which maps the rear I/O signals to a SCSI-3 connector. This model also uses a standard rear front panel assembly with a SCSI-6 connector output.

PMC and CompactPCI bus Compliance
Meets PCI specification version 2.3, CompactPCI specification PICMG 2.3 R1.0, and PMC specification P1386.1.
Meets PCI specification version 2.3, CompactPCI specification PICMG 2.3 R1.0, and PMC specification P1386.1.
Data transfer bus: Slave with 32-bit, 16-bit, and 8-bit data transfer operation.
Interrupts: CompactPCI bus INTA# interrupt signal
PCI Interface: PLX Technology PCI6540 transparent PCI/PCI bridge for data transactions from the PCI bus (system host) to the PMC site. The bridge device provides a 32-bit 33/66 MHz PCI interface.

Ordering Information

Carrier Cards
AcPC4610CC
CompactPCI bus carrier card for one PMC module, conduction-cooled
AcPC4610E
CompactPCI bus carrier card for one PMC module, air-cooled. See Bulletin 8400-485.

Accessories (see accessories documentation for details)
TRANS-C4610: Transition module, air-cooled
5028-432: Shielded cable, SCSI-1 68-pin connector, 2m long.
5025-288: Termination panel, DIN rail-mount, 68 screw terminals, SCSI-3 connector.
