# TCP201 CompactPCI Carrier for 4 IndustryPacks

Application Information

The TCP201 is a standard 6U CompactPCI Carrier with front I/O for up to four single-size or two double-size IndustryPack (IP) modules used to build modular, flexible and cost effective I/O solutions for applications in process control, medical systems, telecommunication and traffic control.

For improved EMI protection, four HD50 SCSI-2 type connectors are mounted in the EMI front panel of the TCP201 and provide access to all IP I/O lines. Status indicators for IP access, +5V and +/-12V are provided in the front panel.

The TCP201 can operate with 3.3V and 5.0V PCI I/O signaling voltage.

All IP interrupt request lines are mapped to PCI INTA. For fast interrupt source detection, the TCP201 provides a special IP interrupt status register.
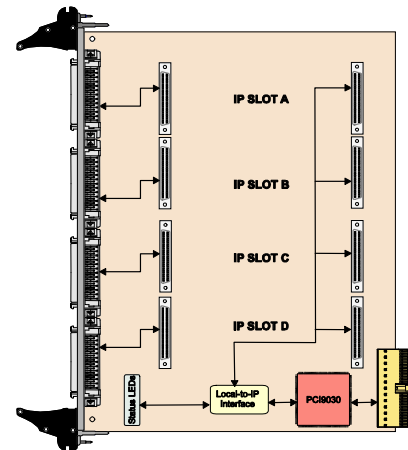

The IP power lines are fuse protected by self healing fuses and RF filtered. The operating temperature range is -40°C to +85°C.

The TCP201 complies with the PICMG 2.0 Revision 3.0 CompactPCI specification.

For First-Time-Buyers the Engineering Documentation TCP201-ED is recommended. The Engineering Documentation includes TCP201-DOC, schematics and data sheets of the TCP201.
