ABOUT TEWS TECHNOLOGIES

TEWS TECHNOLOGIES is a leading solutions provider of embedded I/O and CPU products based on open architecture standards such as PMC, IndustryPack® (IP), CompactPCI, standard PCI, VME, and AMC. TEWS has more than 30 years of experience designing and building turn-key embedded interface solutions using the philosophy to listen and respond to our customers' needs.

Using this 'customer first' approach, TEWS has developed a large number of standard and custom products for applications in industrial control, telecommunication infrastructure, medical equipment, traffic control and aerospace/defense. TEWS' line of embedded I/O solutions is available worldwide through a global network of distributors.

QUALITY ASSURANCE / WARRANTY

TEWS operates three subsidiaries to meet global demand for pre and post sales support, reduced development time, long term product availability, and complete product life-cycle management. TEWS is committed to continuously

improving the quality of our products and services. As a reflection of our commitment to quality, TEWS has implemented and received ISO9001:2000 certification. All TEWS' products feature a five-year limited warranty.

ROHS / WEEE COMPLIANCY

TEWS TECHNOLOGIES believes in conducting business in a manner that respects the environment and consequently has embraced the RoHS regulations of the European Community. TEWS now produces RoHS-compliant versions of our products, provided all required components are available RoHS-compliant. Products which do not have RoHS-compliant components available may be redesigned to meet the regulations on a case-by-case

basis. Redesigned product will match the original product in form, fit and/or function whenever possible. Non-compliant products will continue to be available for all applications which are exempt from the RoHS directives and have a continuing requirement for leaded solder. More information regarding RoHS compliance is available on the specific product pages at www.tews.com.

SOFTWARE SUPPORT

Software support is a critical and defining component of the TEWS' I/O product offering. Our modular hardware designs are coupled with extensive software drivers and support for most major real-time and server operating systems such as VxWorks, Windows XP/XPE/2000, Linux, LynxOS, and QNX6. Supported CPU architectures are Intel, PowerPC and 68k (for IndustryPack only). For IndustryPack carriers and modules, TEWS has developed

a layered driver concept that includes both a carrier driver layer and an IP module driver layer. All TEWS' IndustryPack carriers are supported directly by the carrier driver, and a generic driver is included for integration of third party products. A key element of our software is our support staff. All TEWS' support engineers are professionally trained to ensure in-depth support for software drivers and integration.

C P U C A R R I E R S

TEWS' PowerPC based VME Single Board Computers with IndustryPack and PMC sites deliver both high-performance processing and configurable I/O solutions in a single VME slot. In addition, TEWS' SBCs provide the ideal upgrade path for current 68K-based IndustryPack carriers.

CPU CARRIERS	Form Factor	Processor		-40°C to 85°C	Debug PROM	SDRAM	Flash	Ethernet	SCSI	Serial Ports	I/O Support	I/O Connector	Software

P M C C A R R I E R S

TEWS offers a complete line of PMC carrier boards for 3U and 6U CompactPCI as well as standard PCI. Our PMC carriers provide high-performance and high-density I/O solutions in addition to simplifying the integration process.

PMC CARRIERS	Form Factor	PMC Slots		-40°C to 85°C	I/O Connector	PCI I/O Signaling Voltage	Hot Swap Capability	Bridge	Bus Frequency	Bus Width
TCP260	cPCI 6U	2			PMC front cPCI J3/J5	3.3V 5V	●	21154	33/66 MHz	32/64 bit
TCP261	cPCI 6U	2			PMC front cPCI J3/J4	3.3V 5V	●	21154	33/66 MHz	32/64 bit
TCP270	cPCI 3U	1	●		PMC front J2	3.3V 5V			33 MHz	32 bit
TPCI270	PCI	1	●		PMC front rear I/O	3.3V 5V			33 MHz	32 bit

IP CARRIERS

When combined with our extensive line of IndustryPack modules, TEWS' IndustryPack carriers offer maximum I/O density for VME, CompactPCI, and PCI systems. The ability to mix and match IndustryPack modules on TEWS' carriers customizes I/O and saves valuable slot space.

IP CARRIERS

		Form Factor	IP Slots	-40°C to 85°C	I/O Connector	32 MHz Support

USER-PROGRAMMABLE FPGA

TEWS' user-programmable FPGA modules provide a cost effective solution that allows customers to implement their own logic design. TEWS uses the latest high-density FPGAs available, and additionally can customize the products for OEM requirements.

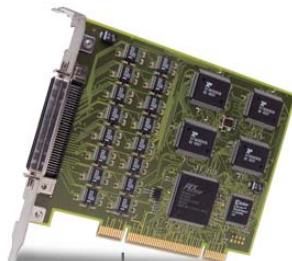

FPGA	Form Factor				Interrupts	I/O Connector	Software

COMMUNICATION

As part of our growing commitment to the embedded I/O marketplace, TEWS continues to extend its product range of I/O and CPU solutions based on IndustryPack, PMC, CompactPCI and VME standards.

The modules are designed for applications in transportation, military/aerospace, communications, and process control. Solutions are available with a large choice of channel count, throughput, form factor, and operating temperatures.

TCP872	cPCI	●	2 x Type I/II or 1 x Type III	3.3V/5V	●

TELECOM

TEWS provides a high performance hardware platform for E1/T1 telecommunication applications. Complete integrated solutions, including a wide variety of communication protocol stacks, are available in cooperation with our software partners.

TELECOM	Form Factor	Ports	Processor	Flash	SDRAM	I/O Connector	Software
TPMC402	PMC	2 x E1/T1	MPC860P/80 MHz	4 MB	32 MB	RJ45	¹⁾
Notes	¹⁾ Ask for protocol support						

TRANSITION MODULES

For function and IndustryPack/PMC specific connectivity, TEWS offers a wide range of transition modules. These include universal and product-specific transition modules, DIN rail mount modules, and high-density serial transition modules. TEWS' IndustryPack carriers for VME and CompactPCI support rear I/O connectivity in tandem with rear transition modules. These transition modules are available with different connector styles and different mechanical dimensions.

TRANSITION MODULES	Form Factor	Supported Products	Interface	I/O Connector	-40°C to 85°C	Front Panel
TVME001-TM	VME64x	IP Carrier 6U	P0/P2	50pin ribbon cable	●

PIM CARRIERS

The PIM specification simplifies rear I/O for PMC modules that reside on CompactPCI or VME64x carrier cards, connecting via a clearly defined pin-out from PMC connector P14 through the CompactPCI or VME64x backplane, and passing to the PIM mezzanine carrier at the rear of the backplane.

Connections may then be customized with the use of different PIM modules on the PIM carrier.

PIM CARRIERS
