Key Features

- One slot benchtop 6U VPX development platform
- P5 to P6 with six VITA 66.5 or 66.4 connectors option
- Variable fan speed control for front and rear
- Removable panels for ease of access for probing
- Support for Rear Transition Modules (RTMs)
- Allows for a shelf manager to do health monitoring
- JTAG connector
- User setting of SYSRESET, NVMRO, etc.
- On board battery pack to provide the VBAT
- Vertical or Horizontal positioning on bench

Benefits

- Optional shelf manager supporting Tier 2 Health Management
- 400 W AC Power supply
- Ease of access to board under development
- Electrical, mechanical, software, and system-level expertise in house
- Full system supply from industry leader
- AS9100 and ISO9001 certified company

OpenVPX™

vadatech
THE POWER OF VISION
**VTX991**

The VTX991 is a single slot 6U VPX chassis for board bring-up and testing of 6U VPX modules. The chassis can accept a front and a rear module (5HP or 10HP). The panels on both the front and rear slots are removable for ease of probing and debugging.

The VTX991 can be placed on bench in both horizontal and vertical positioning for ease of access.

**Power Supply**

The VTX991 comes with a Universal AC power supply which provides 400 W to the chassis. The chassis supplies all the necessary power (+12 V, -12 V, +5 V, etc.) to the module in accordance with VITA 46 specifications.

VTX991 also comes with a battery pack which provides the VBAT to the module. The VTX991 allows the power to VBAT to be switched between the on-board battery pack and the power supply. Each of the rails have a sense resistor to allow the user to monitor how much power is being drawn from each rail using a simple voltmeter.

**Cooling**

The VTX991 provides cooling to the module via a variable fan speed for both front and rear.

**Backplane**

The backplane provides all the necessary VITA 46 signals set by the user (NVMRO, SYSRESET, SYS_CON, driver the dual clock, etc.). All the connectors are installed P0 thru P6 and are routed from the front to the rear.

**Health Monitoring**

The dual IPMI bus is routed to a connector compatible with an external VadaTech VT007 bench top shelf manager for monitoring the VPX board sensors, compliance to VITA 46.11, etc. The VT007 supports Tier 2 Health Management and can be ordered separately or as an option with VTX991.

**JTAG**

The backplane brings out the JTAG signals to a header to allow connection to an external JTAG probe.

### INTEGRATION SERVICES AND APPLICATION-READY PLATFORMS

VadaTech has a full ecosystem of OpenVPX, ATCA and MTCA products including chassis platforms, shelf managers, AMC modules, Switch and Payload Boards, Rear Transition Modules (RTMs), Power Modules, and more. The company also offers integration services as well as pre-configured Application-Ready Platforms. Please contact VadaTech Sales for more information.

Choose VadaTech

We are technology leaders
• First-to-market silicon
• Constant innovation
• Open systems expertise

We commit to our customers
• Partnerships power innovation
• Collaborative approach
• Mutual success

We deliver complexity
• Complete signal chain
• System management
• Configurable solutions

We manufacture in-house
• Agile production
• Accelerated deployment
• AS9100 accredited
