Integrated portable webcasting production system

PORTABLE STREAMING MEDIA ENCODER

TRAINING | WEBCASTS | BUSINESS-TO-BUSINESS COMMUNICATION

The Niagara*MAX* is the new benchmark for portable live webcasting and part of the ViewCast's family of packaged streaming media and encoding systems.

The Niagara*MAX* is ideal for:
• Corporate presentations, meetings, special events
• Distance learning, employee training, online seminars
• Live or on-demand entertainment, news, sports or weather
• Federal, state or municipal government production

This compact portable system collapses into a sleek aluminum briefcase so it can be easily transported to offsite locations for remote streaming flexibility. The Niagara*MAX* also features a Box-in-Box Design Shock Isolation System to protect your portable webcasting gear as you transport it in and out of the field.

Includes exclusive Niagara® features:
• ViewCast SimulStream® - Premium software that extends the capabilities of Osprey Video capture cards. SimulStream enables a single Osprey Video card to output multiple instances of audio and video data from a single input source to multiple applications.

• Niagara SCX® *Standard* - Niagara Stream Control Extension (SCX) software, users can setup and control streaming systems throughout an enterprise or over the Internet with a single interface for multiple encoding and streaming formats, including uncompressed AVI capture to file, Flash capture to file and Windows Media® and RealVideo® capture to file and stream.

For a complete digital solution, consider:
Accordent PresenterPLUS
• Authoring of synchronized rich media content
• Combine PowerPoint slides, web pages, video, audio and "email the presenter" campaigns
• Wizard for step-by-step creation of customized presentations.
