PRELIMINARY INFORMATION

OVERVIEW
The VPX3U-GP104-VO module uses a WOLF chip-down design to provide NVIDIA’s advanced Quadro Pascal GPU technology in an extremely rugged module, making it an excellent choice for aerospace and defense applications. WOLF designs and manufactures these modules in North America with full component traceability.

These modules are designed and manufactured specifically for use in the harsh environments encountered in military and aerospace applications. They have been designed to pass MIL-STD-810 and DO-160 environmental tests. They have been manufactured to IPC-A-610 CLASS 3 and IPC 6012 CLASS 3 for high reliability electronic products. They are compliant with IPC J-STD-001 soldering standards.

Quadro Pascal GP104 is an enormous leap in processing power compared to the previous generation Maxwell GM204. This rugged Pascal-based module can provide up to 8.7 TFLOPS with 2560 CUDA cores, providing exceptional processing power to applications which benefit from parallel processing. It includes four DisplayPort 1.4 outputs, which provides support for High Dynamic Range (HDR) video, and resolutions of 4K at 120Hz or 5K at 60Hz with 10-bit color depth.
